OPTIONAL																							
opz-D08	Test rig according to D08 standard								●	●	●	●	●										
opz-DELTAP	Test rig for differential pressure measurements			●	●				●	●													
opz-CA	Water column 0+0,2 bar										●												
opz-C	Fidelity & sensitivity test					●	●																
opz-HP	High pressure test (static & pulsing) Max. 100 bar	●	●																				
opz-LM	Equipment for endurance test of single lever mixer													●									
opz-LBM	Equipment for endurance test of swivel spouts														●								
opz-LD	Equipment for endurance test of automatic diverters															●							
opz-LR	Equipment for endurance test of traditional and ceramic single taps																●						
opz-LTM	Equipment for endurance test of thermostatic mixers																	●					
opz-LSM	Equipment for endurance test of shower mechanism																		●				
opz-TS	Equipment for endurance test of thermal shock																			●			
ADDITIONAL EQUIPMENTS																							
opz-SHOWER	Shower column cabin			●	●																		
BT400-RUB	Dial gauge and protection cover 0+600 bar	●																					
SPECIFIC TEST BENCH																							
BP-RUMORE	Acoustic test bench 0,1+47 L/min							●															
BPR-1L-VM-SWG	Endurance test bench													●	●	●	●	○	○	●			
special equipments																						●	●

**Note:**

\* Tests performed with special equipment not included in the tests benches.

**Legend:**

	Test not provided for by standard
●	Executable test
○	Executable test by installing optional equipment or specific software
